TU-521 CONTROL BOARD, SINGLE PHASE COMPRESSOR TRAINER

Consists of an actual single phase compressor with components necessary to demonstrate all common types of controls in refrigeration and air conditioning systems.

Specifications

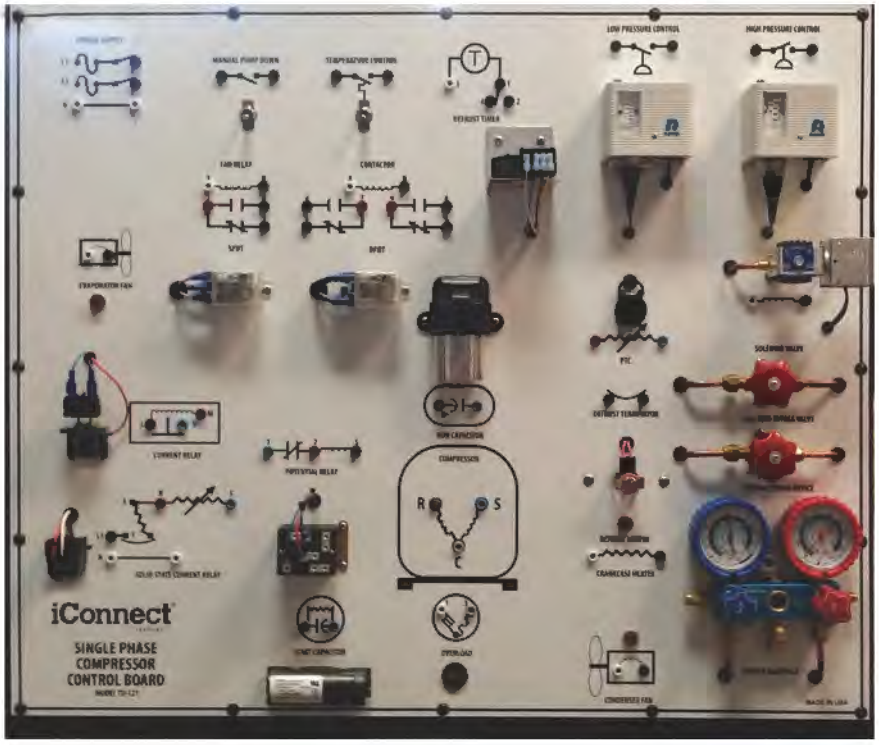
Electrical requirements: 120VAC, single phase, 60 Hz

Uses HFC 134a refrigerant

Overall size: 35" L x 13" W x 30" H

Features

- Components are put into the system with patch cords
- Shut-off valves in suction and pressure lines allow pressures to be varied to operate the low pressure control and high pressure cutout
- PSC (permanent split capacitors) and running capacitors are supplied for capacitor (capacitive) start systems
- Includes Lab Manual



Shipping Weight: 190 lbs.
Shipping Dimensions: 37" L x 48" W x 40" H
